Design & Assembly

Our design, development, technical and production teams offer flexible, high quality products for niche applications and markets.

From conception to production, knowledge and understanding of materials, component design fundamentals and market experience is applied.

Combining precision manufactured miniature components with our production services and expertise is a key competence at The West Group.

Leading the way in component quality and production excellence

With both **component and production capability** at our finger tips, we have worked to develop our capabilities to support a large variety of markets.

Knowledge and experience gained over fifty years of operation is supported by our highly skilled, experienced and specialist teams.

Across every area of our business we focus on delivering the best available products and services to our customers.

It is for this reason we are now in the fortunate position to support companies and manufacturers worldwide.

Our **service capabilities:**

- White Room Assembly
- Component Marking
- Bespoke Product Design
- Kitting & Packing
- Testing & Inspection
- Class 7 & 9 Cleanroom Facilities
